

## Water Supply Intake downstream from West Lake

The North Plant intake for the Missouri American Water is located on the Missouri River 8 miles downstream of the West Lake landfill. The North Plant analyzes their

- Finished water is analyzed for uranium and radium ( $\alpha$ -emitters) every 9 years.
- The last analysis was in 2007 and is scheduled for the next rad analysis in 2015.
- In 2007, none of the samples exceeded the MCL.
